List of Examples

2.1. Plug-in dependency	2
-------------------------------	---

Chapter 1. Introduction

Vector layers can display geometrical information on a map, e.g. countries as polygons. Mostly, the vector layer contains more information about these features, e.g. the name of a country. The Search And Filter Widget libraries offer methods to search and/or filter the feature info.

Chapter 2. Configuration

1. Dependencies

Make sure you include the plug-in in your project. If you are using Maven, add the following dependency to your pom:

Example 2.1. Plug-in dependency

```
<dependency>
  <groupId>org.geomajas.widget</groupId>
  <artifactId>geomajas-widget-searchandfilter-gwt</artifactId>
  <version>1.16.0</version>
</dependency>
```

Chapter 3. How-to
